

ASSIGNMENT

Assignment: Sequence Diagrams & Collaboration Diagrams

Submitted by: Endri

Next Meeting: Sunday 21:00 where we will discuss the diagrams you've made.

Deadline: Sunday, 15:00

Tasks:

Sequence Diagrams

- Remake all assigned sequence diagrams (based on previous activity diagrams).
- Exclude UI/boundary elements (e.g., Mobile Guest Portal, Staff Interfaces).
- Use existing classes/methods (no new classes; enrich existing ones if needed).

Collaboration Diagrams

- Create one collaboration diagram per sequence diagram.
- Ensure consistency with sequence diagrams (same methods/classes).

Rules:

- ✓ Methods/classes must exist in the class diagram.
- ✗ No new classes (only extend existing ones with logical methods).
- ✗ No duplicate methods (rename/reuse existing ones if functionality overlaps).
- ✓ Every diagram you make has to be saved in your computers for changes in the future.

Every diagram failing the rules above will require revision
